

**Project Description Component: Monitoring**

Feature	Description	Notes
Adult Salmon Passage Evaluation	Funding will be provided to carry out an adult salmon passage evaluation to determine methods of improving passage of adult San Joaquin Chinook salmon due to the flow control structures or fish control structure.	
Test Fish	Funding will be provided to plan, design, and, as appropriate, construct the Tuolumne River Fish Augmentation Facility in order to ensure that a sufficient number of test fish are available to conduct the VAMP experiments and future monitoring on the San Joaquin River system.
